

SAFETY INSTRUCTIONS FOR VISITORS

Welcome as our guest. For the safety of all, we strictly follow the safety instructions in line with the standards that guide our operations. Please read these instructions in advance. If necessary, you can contact your host with whom you have arranged the visit. Our goal is zero accidents.

Marked parking spaces reserved for visitors are located **near the entrance**.

1. ONLY MOVE AROUND WITH YOUR HOST

- When you arrive, contact your contact person.
- In order to maintain confidentiality, we can only show visitors things related to their own work in production.
- Smoking is only allowed in designated areas.
- Photography is prohibited in production facilities.

2. BE VISIBLE AND OBSERVE YOUR SURROUNDINGS

- High visibility clothing and protective equipment must be worn in production facilities.
- Move around carefully, use marked routes and pay attention to forklift traffic and objects being transferred by cranes.
- Keep a sufficient distance from machine tools.
- Report any dangerous situations, accidents or safety deficiencies you observe.

3. PREPARE FOR EMERGENCIES

- Read the safety instructions in advance.
- Find out the location of assembly points planned for emergencies.
- In the event of an emergency, go to the nearest assembly point and follow the instructions from the staff.
- A defibrillator can be found in the hallway next to the breakroom.

Protective equipment required in production facilities and assembly points and emergency exits

— Hearing protector ≥ 80 dB

— Safety goggles

— High visibility vest

— Safety shoes
